The Japanese Zero had a reputation as a tough, fast, and maneuverable fighter aircraft long before Pearl Harbor. The first encounters with the Zero were by the famous Flying Tiger pilots over China in 1940. Their combat stories were heard all the way back in the United States.

Your Monogram Zero is the A6M5 model

which was a revision of the first planes. The Japanese found the need to upgrade many areas such as armor, self-sealing tanks, and heavier power plants. By war's end a total of 10,000 of all Zero variants were produced by Mitsubishi and Nakajima plants, more than any other Japanese warplane.
